

Virtual Instructor-Led Training (VILT)

Power Monitoring Expert (PME) Advanced Programming (4-Day) 3000PMEPROG300

Virtual Environment Used

- The VILT will be deployed in the WebEx™ tool / environment.
- Confirmed attendees will receive an email with complete step-by-step instructions, 1-2 business days prior to the start date of their course. The email will include the class hours, connection information, log-on credentials, and links to download the course materials.
- **NOTE:** You will be expected to participate and complete the hands-on lab exercises, just as you would if you were attending an in-person class at our training facility.

Duration

- Monday through Thursday; daily class hours may vary. This information will be included in the email from PMU 1-2 business days prior to the course start date, as stated above.

Prerequisites

- Familiarity with a WebEx™ or other remote conferencing interface (UI).
- A “good” internet connection. Please test your connection with a “speed test” type tool available on the internet.
- Have a comfortable, quiet place with minimal background noise to sit/stand/work during your scheduled virtual class.
- It is highly recommended to use a second monitor during your session(s) or at minimum, print out the lab exercises that will be provided prior to class.
- It is also recommended to use a headset with a microphone to eliminate background noise and easily communicate any questions you may have during training.
